Programming Languages

- Elixir
- SQL
- JavaScript
- TypeScript

Frameworks/Libraries

- React
- Playwright

Tools

- VS Code
- GitLab
- Jira
- Postman
- Claude

EXPERIENCE

DIVVY PAY / BILL | Draper, UT | 2018–present

Progressed from Customer Technical Support to Senior Software Development Engineer in Test, contributing to product quality through customer advocacy, defect investigation, test automation, and quality engineering initiatives

BILL | Senior Software Development Engineer in Test

- Developed end-to-end and API tests for an accounting software implementation feature
- Selected to lead automation initiatives due to strong technical execution and cross-team collaboration

BILL | Software Development Engineer in Test II

- Reinforced an automation-first QA approach by focusing on automated test development and limiting manual testing to feature consultation and exploratory validation
- Established a more grounded and deliberate testing suite for a feature providing white-labeling for a Fortune 50 bank partner
- Transcribed existing automated tests from Elixir to TypeScript for a QA-wide migration to Playwright

Divvy Pay | Software Development Engineer in Test I

- Self-taught programming and test automation in Elixir to support the company's transition from manual to automated QA practices
- Developed and maintained the automated testing framework for a newly developed credit application platform, integrating test execution into the CI/CD deployment pipeline

Divvy Pay | Bug Triage Specialist

- Analyzed bug trends and issue volume in Jira, delivering weekly insights that helped engineering teams prioritize and resolve high-impact defects
- Performed manual testing to investigate reported bugs, determine severity and priority, route issues to the appropriate engineering teams, and coordinate follow-up communication with customer service representatives

Divvy Pay | Customer Technical Support

- Provided technical support to customers via phone and chat by troubleshooting software issues, reproducing reported problems, and guiding customers through product functionality
- Facilitated startup operations through customer account creation, fraud reporting, balance investigations, and physical card fulfillment

INTERMOUNTAIN HEALTHCARE: SANPETE VALLEY HOSPITAL | Mt. Pleasant, UT | 2015–2018

Health Information Management (Medical Records)

- Released and organized medical records for authorized patients and medical personnel
- Worked on audit-related data entry projects for patient records

EDUCATION

UNIVERSITY OF UTAH | Salt Lake City, UT | 2023

The Coding Bootcamp

- Implemented front-end and back-end features for various projects using JavaScript, React, Node.js, Express, MongoDB, GraphQL, and Apollo Server, including user authentication and database integration
